

# Surgery

## Surgical options for care close to home

As faculty providers of the Department of Surgery in the College of Human Medicine at Michigan State University, our team approach offers consultation among our members to give you the benefit of our group's expertise. Additionally, as academic surgeons, we are continually researching and teaching advanced surgical standards in our educational programs through our affiliation with area teaching hospitals, to provide the most appropriate surgical care for Michigan.

We offer a variety of surgical & non-surgical services including breast oncology and surgery, cosmetic surgery, endocrine surgery, general surgery, hepatopancreatobiliary surgery, plastic & reconstructive surgery, podiatry, trauma & surgical critical care, and vascular & endovascular surgery.

### MSU Health Care Surgery
