

# Your provider, virtually anywhere.

To help reduce the spread of COVID-19, MSU Health Care is encouraging patients to consider using Telehealth. Keep your already scheduled appointments, book new visits, and safely see your provider from the comfort of your home.

## ***What is Telehealth?***

Telehealth visits are real-time virtual visits with your provider that incorporate audio or video.

## ***What equipment do I need to schedule a Telehealth visit?***

You will need a phone, tablet or computer. To download our app, follow the instructions [Preparing for Your Virtual Visit](#) or visit our [website](#).

## ***What can my doctor treat me for in a Virtual Visit?***

Visits such as a routine follow-up, medication refills, and certain illnesses are all examples of visits that can occur through a Telehealth visit. Our schedulers can verify if your visit would be eligible.

## ***How much does a Virtual Visit cost?***

Costs are defined by the type of insurance plan you have. Please note that audio-only visits are only covered by specific insurances. If there is a co-pay required by your insurance providers, a bill will be sent to you after your visit. We do have a self-pay option of \$49.95 for those without insurance.

## ***Sign up for MyMSUHealth Portal***

MyMSUHealth is one place to see all your records within the MSU Health Care network. Visit summaries, vitals, and lab results. Your after-visit summary from your Virtual Visit is always available to portal users. Sign up today.
