Multiple Myeloma: Symptoms, Therapies, and Communicating with your Healthcare Team

VIRTUAL EDUCATION
WEBINAR
Link will be sent to registrants upon registration. An email is required to register. Pre-registration for this free program is required.

SPEAKERS
Craig Cole, MD
Breslin Cancer Center
Michigan State University

Lauren Hamel, PhD
Karmanos Cancer Institute
Wayne State University

PROGRAM
African Americans have roughly twice the incidence of myeloma as white Americans, with recent studies finding that blacks are also less likely to receive the latest myeloma treatments or combination therapies, and more likely to encounter delays in receiving treatment, including transplants.

This is a free educational event where participants will learn the basics of myeloma including symptoms and how the disease progresses, as well as, current and emerging therapies in the treatment of multiple myeloma. Dr. Hamel will discuss tools to use when talking with your doctor to properly advocate for yourself.

We encourage you to invite your caregiver and family members.
